Здоров'я планується вчасно.

Order No: **3388280 / 2021-12-24 10:00** Execution time: 2021-12-24 10:30

Patient: **Сосновська Надія Юріївна** Date of birth: **1999-06-08** Sex: **F**

Results

Your result of the rapid test for antigen COVID-19

NEGATIVE

A negative result for this test means that STANDARD Q COVID-19 ANTIGEN (the cause of COVID-19) was notdetected in the collection sample. What does it mean to have a negative test result? A negative test resultdoes not completely rule out being infected with COVID-19. If your test negative for COVID-19, this meansthe virus was not detected at the time your specimen was collected. It is still possible that you were veryearly in your infection at the time of your specimen collection and that you could test positive later. Also,you could beexposed later and still develop the illness.For all these reasons, it is important to follow theMinistry of Healthcare of Ukraine guidance, included but not limited to frequent hand washing, socialdistancing, wearing a face covering, covering coughsand sneezes, monitoring symptoms, and cleaning anddisinfectantof frequently touched surfaces –even after a negative test result.

Test information:

Test name
Detection of STANDARD Q COVID-19 ANTIGEN

Method
immunochromatographic

Detection type
Qualitative detection

Test-system manufacturer
SD Biosensor, INC

Serial number
LOT QCO3020023C /Sub: C-6 (2022-07)
